

YA-PS03

Hydraulic Patient Transfer Stretcher

*Better care
Better comfort!*

YA-PS03

Hydraulic Patient Transfer Stretcher

Excellent manipulation and steering, ergonomic design to alleviate the workload of medical staff, plus the equipped most famous pump system, YA-PS03 is able to ensure the perfect operation experience and safety for both patients and medical staff during transfer. The unique design railing provides a convenient bridge for patient easy move from stretcher to bed.

2 Guardrails	1 Set Of The Fifth Wheel	2 lifting air springs on the back
1 Knee Handle	1 Integral Bottom Tray	4 Standard Infusion Stand Jacks
2 Infusion Stand	1 Waterproof Mattress	2 Recording Table (Optional)

ACCESSORIES LIST

FEATURES

- Back lifting system: controlled by silent double gas springs, strong load bearing and good stability.
- High and low lifting system: imported brand hydraulic cylinder control, more stable quality.
- Knee adjusted by crank.
- The feet can be adjusted separately with the gear buckle.
- Bed platform: transparent, with 7 cm thick mattress and straps,suit for X-RAY.
- Frame: welded by high-quality steel bent pipe.
- PP resin molded side rail with angle display.
- The side rail can be fixed horizontally.
- Casters: Four casters with diameter 200mm are adopted with central locking.
- Fifth guide wheel.
- Equipped with an infusion pole, which can be stored in the infusion stand storage rack under the bed.
- The surface of the mattress is waterproof, easy to clean, equipped with zippers,and the 7 cm sponge is comfortable to lie on.
- Anti-collision wheels around the bed.
- There is a P-shaped push handle at the head of the bed and a U-shaped handle at the end of the bed.

- ↑ The back section is adjusted by double gas springs, which can be fixed in any position.

- ↑ Foot can be lifted individually by gears and can be fixed at any height.

- ↑ The Side rail has handle for easy pushing, and the buckle is convenient for fixing the infusion tube.

- ↑ The knees are adjusted by the crank, which can be fixed in any position.

- ↑ Has fifth guide wheel to improve the transfer efficiency.

- ↑ There are foot pedals on both sides of the bed, allowing medical staff to adjust the bed from either side.

- ↑ Trendelenburg and reverse trendelenburg is controlled by hydraulic pedals, easy and stable operation.

- ↑ The side rail is equipped with a 0~75 degree angle indicator.

- ↑ Has urine bag hook, which can also be used to hang small instruments.

- ↑ Side rail can be raised, dropped down and fixed at a horizontal position as a transfer board, creating zero gaps for quick and easy transfers also can storage items and used as an arm-rest, and with double locking function, better load bearing.

- ↑ Side rail can be raised, dropped down and fixed at a horizontal position as a transfer board, creating zero gaps for quick and easy transfers also can storage items and used as an arm-rest, and with double locking function, better load bearing.

- ↑ The hidden P-shaped handle at the head of the bed and the U-shaped handle at the end of the bed are easy to push, anti-collision wheels and anti-collision blocks around the bed.

↑ The bottom has ABS cover, and there is an oxygen cylinder bracket, which can accommodate two oxygen cylinders, also can storage other equipment.

↑ The bed surface is transparent, with a 7 cm thick mattress and straps, suit for X-RAY.

Technical data	
Overall size	L 2150*W 800*H 600~930 mm
Bed size	L1915*W 640 mm
Back section adjustment	0 ~ 90°±5°
Knee section adjustment	0 ~ 40°±5°
Foot section adjustment	0 ~ 30°±5°
Trendelenburg/Reverse trendelenburg adjustment	-15°~ 15°±2°
Side rail height	≥315mm
thinnest point of side rail	≥20mm
Load bearing of side rail	≥15kg
Load bearing of urine bag hook	≥30kg
Castor	Dia 200mm
Oxygen bottle bracket capacity	Single is ≥10L
Bottom storage plate size	≥380*300mm
Load bearing of Bottom storage plate	≥10Kg
Safe working load	220KG
